SPECIAL EDITION
Souverän® 1005 black

Once upon a time, a judge went into a fountain pen store and said „I want a piston fountain pen with the biggest possible filling capacity as I write all day long.“ The well-informed clerk conjured up the M1005. The judge drank a cup of espresso by way of celebrating his purchase and was happy ever after.

The largest fountain pen of Pelikan has a length of 14,7cm (with closed cap) and is available with silver trimmings for a limited time only.

The barrel and cap are both made of high-quality resin in shiny black while the clip and the rings are palladium plated to get the silver sheen. The 18 carat gold nib has been completely covered with rhodium to make this classical fountain pen sleek and modern up to the very tip - em, nib.

Each fountain pen is packed inside the attractive gift box G15 and can be matched with the modern lacquer leather case in shiny black.
